CONTENTS OF VOLUME 51, 1992

(All rights reserved)

PAGES

Satiety *(Symposium Proceedings: 27–30 August 1991)*

Gastrointestinal satiety in animals other than man. *D. V. Rayner* 1–6
Role of gastrointestinal factors in hunger and satiety in man. *N. W. Read* 7–11
Metabolic aspects of satiety. *J. M. Forbes* 13–19
Integration of internal and external signals in intake control. *D. A. Booth* 21–28

Dietary Advice *(Symposium Proceedings: 27–30 August 1991)*

Dietary reference values. *R. G. Whitehead* 29–34
Are there conflicts in dietary advice for prevention of different diseases? *M. J. Gibney* 35–45
Dietary advice: foods or nutrients *D. A. T. Southgate* 47–53
Nutritional information: do we know what we are eating? *Richard Moody* 55–61
Is our dietary advice effective? *A. E. de Looy, P. L. Auty & C. A. Coates* 63–69

Nutrition and Development *(Symposium Proceedings: 27–30 August 1991)*

Jamaican studies in nutrition and child development, and their implications for national development. *Sally M. Grantham-McGregor & George Cumper* 71–79
Nutrition and health development – lessons from Kerala. *C. R. Soman* 81–92
Nutrition and socio-economic development in Southeast Asia. *Rodolfo F. Florentino & Regina A. Pedro* 93–104

(Workshop Reports: 27–30 August 1991)

Nutrition information and training: networking in international community nutrition. *Jacqueline Landman & Ann Burgess* 105
Can nutritional indicators be used to measure economic development? *Elizabeth Dowler & Jane Pryer* 107

Comparative Aspects of the Concepts in Animal and Human Energy Metabolism *(Symposium Proceedings: 27–30 August 1991)*

Integration of human and animal concepts of energy metabolism. *Paul W. Moe* 109–115
Approaches and limitations to the prediction of energy requirements in wild animal husbandry and veterinary care. *James K. Kirkwood & Peter M. Bennett* 117–124
Merits of empirical and mechanistic approaches to the study of energy metabolism. *K. J. McCracken* 125–133

Impact of Diet on Critical Events in Development *(Symposium Proceedings: 27–30 August 1991)*

The effect of nutrition of the fetus and neonate on cardiovascular disease in adult life. *D. J. P. Barker* 135–144
Food and biological clocks. *Brian Wharton* 145–153
Breast and gut: the relationship between lactating mammary function and neonatal gastrointestinal function. *Lawrence T. Weaver* 155–163
Maternal and environmental influences on thermoregulation in the neonate. *M. E. Symonds & M. A. Lomax* 165–172
Diet effects on enterocyte development. *Michael W. Smith* 173–178

Micronutrient Transport Processes *(Symposium Proceedings: 27–30 August 1991)*

Tocopherol transport and absorption. *William Cohn, Peter Gross, Hugo Grun, Francine Loechleiter, David P. R. Muller & Martin Zulauf* 179–188
The transport of vitamin C and effects of disease. *C. J. Schorah* 189–198
The transport of iron and copper across the cell membrane: different mechanisms for different metals? *Harry J. McArdle* 199–209
Dose dependence of zinc and manganese absorption in man. *Brittmarie Sandström* 211–218
Folate–vitamin B_{12} interrelationships in the central nervous system. *John M. Scott* 219–224

Cystic Fibrosis *(Symposium Proceedings: 27–30 August 1991)*

Nutrition in cystic fibrosis: a historical overview. *John A. Dodge* 225–235
Energy metabolism in cystic fibrosis. *A. O'Rawe* 237–244
Fat-soluble vitamins in cystic fibrosis. *Rosemary J. Rayner* 245–250

The Sir David Cuthbertson Medal Lecture 1991 *(21/22 November 1991)*

The mechanisms and treatment of weight loss in cancer. *Kenneth C. H. Fearon* 251–265

New Strategies for Manipulating the Metabolic Response to Severe Illness *(Symposium Proceedings: 21/22 November 1991)*

Modulating the metabolic response to injury and infection. *Stephen F. Lowry* 267–277
The metabolic response to cancer. *Johan Gelin & Kent Lundholm* 279–284
Dietary manipulation of the inflammatory response. *Robert F. Grimble* 285–294

Nutrition and Cognitive Efficiency *(Symposium Proceedings: 3 April 1992)*

Vitamin–mineral supplements and intelligence. *David Benton* 295–302
Vitamin and mineral supplementation and academic performance in schoolchildren. *Michael Nelson* 303–313
Micronutrient intake and psychological performance of schoolchildren: consideration of the value of calculated nutrient intakes for the assessment of micronutrient status in children. *Susan Southon, A. J. A. Wright, P. M. Finglas, Angela L. Bailey & Joanne L. Belsten* 315–324

Use and effects of food and drinks in relation to daily rhythms of mood and cognitive performance. Effects of caffeine, lunch and alcohol on human performance, mood and cardiovascular function. *Andrew Smith, Anna Kendrick & Andrea Maben* 325–333
Personal benefits from post-ingestional actions of dietary constituents. *D. A. Booth, J. A. French, C. J. Wainwright & A. J. H. Gatherer* 335–341
Nutritional influences on mood and cognitive performance: the menstrual cycle, caffeine and dieting. *Peter J. Rogers, Stephen Edwards, Michael W. Green & Pauline Jas* 343–351

The Manipulation of Adiposity *(Symposium Proceedings: 2/3 April 1992)*

Why do people get fat: is adipose tissue guilty? *Margaret Ashwell* 353–365
An evolutionary and functional view of mammalian adipose tissue. *Caroline M. Pond* 367–377
Dietary and other factors involved in the proliferation, determination and differentiation of adipocyte precursor cells. *A. Cryer, S. E. Williams & J. Cryer* 379–385
Influence of diet on the development and regulation of lipogenic enzymes in adipose tissue. *Dominique Perdereau, Fabienne Foufelle, Betty Gouhot, Pascal Ferre & Jean Girard* 387–395
Effects of diet on lipolysis and its regulation. *Richard G. Vernon* 397–408
Effect of diet on human adipose tissue metabolism. *Keith N. Frayn, Simon W. Coppack & Jennifer L. Potts* 409–418
Manipulation of adiposity by somatotropin and β-adrenergic agonists: a comparison of their mechanisms of action. *Terry D. Etherton & Isabelle Louveau* 419–431
Immunological manipulation of adiposity. *David J. Flint* 433–439
Breeding and transgenesis as means of decreasing adiposity in farm animal species: practice and promise. *H. D. Griffin, N. D. Cameron & G. Bulfield* 441–446

ABSTRACTS OF COMMUNICATIONS

27–30 August 1991

Gastric emptying and unidirectional water absorption of glucose solutions in man. *C. S. Primrose, J. B. Leiper & R. J. Maughan* 1A
Effects of guar gum supplementation of breakfast cereals on small intestinal hydrolases in the rat. *J. C. Mathers, Patricia A. Lawlor & D. S. Parker* 2A
Effects of enzyme supplementation on digestibility of wheat feed by weaned pigs. *Devina McClean & K. J. McCracken* 3A
Comparison of the effects of bran and ispaghula on colonic contents in the rat. *C. A. Edwards & M. A. Eastwood* 4A
The effect of supplementing elemental diet with dextran on colonic short-chain fatty acids and cellular proliferation in the rat. *C. A. Edwards, M. Bruce & A. Ferguson* 5A
In vitro fermentation of a galacto-oligosaccharide by human bacteria in continuous culture. *M. Durand, C. Cordelet, G. Hannequart & P. Beaumatin* 6A

Effects of galacto-oligosaccharides (TOS) on bacterial enzymic activities and metabolite production in rats associated with a human faecal flora. *Hiroko Kikuchi, Claude Andrieux & Odette Szylit* 7A
The effects of dietary guar gum or soya fibre on the activities of some NADPH-generating enzymes in rats. *Heather J. Finlayson, Randi Barstad & J. C. Mathers* 8A
The influence of chronic ethanol feeding on duodenal and hepatic monoamine oxidase (*EC* 1.4.3.4) in the rat. *N. P. Kennedy* 9A
The increase in *n*-3 fatty acids in plasma of humans consuming enriched eggs. *David Farrell* 10A
Free radical oxidant generation by murine brain glial cells in vitro: potential nutritional antioxidant interactions and relevance to Alzheimer's dementia. *P. H. Evans* 11A
The effect of dietary iron levels on iron status and antioxidant enzymes in the rat. *H. E. Bristow, J. J. Strain & R. W. Welch* 12A
Influence of heated vegetable oils and α-tocopheryl acetate on susceptibility of chicken tissues to lipid peroxidation. *P. J. A. Sheehy, P. A. Morrissey & A. Flynn* 13A
The effects of dietary lipid source on lipid peroxidation and damage to cardiac tissue induced by ischaemia and reperfusion. *S. O'Farrell & M. J. Jackson* 14A
Effect of *trans* fatty acids on skeletal muscle membrane metabolism and viability. *M. J. Jackson, R. Neale & G. Norton* 15A
Milk choices in Saskatchewan, Canada: consumer behaviour and reasons for milk choice. *Alison M. Stephen & Bruce A. Reeder* 16A
The influence of type of milk and breakfast cereal consumption on daily intake of fat and non-starch polysaccharide in university students. *Alison M. Stephen, Wendy J. Dahl & Glynis M. Sieber* 17A
The effect of variation in sources of energy intake on the nutritional quality of the diet of pre-school children. *Jessica A. Payne* 18A
Intake and sources of sugar in the diet of pre-school children. *Jessica A. Payne* 19A
The absorption of retinol in Bangladeshi children with ascariasis. *F. Ahmed, B. Margetts & A. A. Jackson* 20A
Effect of vitamin A status on serum and tear immunoglobulins in children. *S. M. Filteau, R. A. Abbott, P. Arthur, F. Dinka, J. Gyapong, D. Ross, M. Steward, R. Bailey, B. Kirkwood & A. M. Tomkins* 21A
Plasma vitamin A and E levels in healthy young women. *P. Halford & A. A. Jackson* 22A
Unusual behaviour of a vitamin B_{12}-binder, Transcobalamin 1, in cattle plasma. *J. Price, S. G. Barrie & S. Ueno* 23A
The effect of pyridoxine deficiency on copper status in male and female rats. *J. C. W. Brown & J. J. Strain* 24A
No effect of dietary boron on urinary oestrogen excretion in rats. *J. H. Beattie* 25A
Smoking, and correlations between dietary fat and adipose tissue linoleate (18:2*n*-6) using a food frequency questionnaire (FFQ). *C. Bolton-Smith, M. Woodward & H. Tunstall-Pedoe* 26A
The effect of dietary oil composition on lipid composition of pig meat. *C. A. Morgan, R. C. Noble, M. Cocchi & R. McCartney* 27A

Serum lipids and apolipoproteins (Apo-A1, A2 and B) in the Chinese from mainland and Singapore. *N. Saha & J. S. H. Tay* 28A
Which foods best discriminate between individuals with low-fat and high-fat diets? *S. A. Gibson, D. A. Rose & R. C. Cottrell* 29A
Nutritional status of subjects with middle-aged onset Parkinson's disease. *R. A. Abbott, H. Marcus, M. Cox, M. Hodkinson & A. Tomkins* 30A
The incidence and cause of weight loss in Parkinson's disease. An anthropometric study of eighty-five patients. *H. S. Markus, A. Tomkins & G. M. Stern* 31A
Acid-base status of pre-menopausal vegetarian and omnivorous women. *D. Ball, J. D. Robertson & R. J. Maughan* 32A
Evaluating dietary surveys against energy requirements. *A. E. Black, G. R. Goldberg, S. A. Jebb & A. M. Prentice* 33A
The effects of potassium deficiency on energy balance in the growing rat. *R. Hailwood, S. A. Wootton & A. A. Jackson* 34A
Effect of porcine somatotropin and insulin on nutrient uptake by the hindlimb of growing pigs. *Diane Wray-Cahen, Alan W. Bell, R. Dean Boyd & Dale E. Bauman* 35A
5-Oxo-L-proline and orotic acid excretion during normal pregnancy. *C. Persaud, A. A. Jackson, & G. Werkmeister* 36A
Oestrogen production in human adipose tissue in vivo. *K. N. Frayn, D. U. Hudson, K. L. Boulton & S. W. Coppack* 37A
Development of bio-markers for bone turnover: the excretion of pyridinium cross-links in pre-school children. *F. Branca, A. Duncan, C. Casey, A. Ferro-Luzzi & S. P. Robins* 38A
Total body water measurement in very low birth weight infants using bioelectrical impedance. *D. C. Wilson, T. Baird, C. M. Scrimgeour, G. McClure, H. L. Halliday, M. McC. Reid & M. J. Rennie* 39A
Ultrafiltered cow's milk as a milk substitute for rat pups. *J. L. Smart, R. F. Massey, A. C. McMahon & D. G. Dalgleish* 40A
Energy cost of egg formation in quail. *S. Ward & M. G. MacLeod* 41A
Urea kinetics in free-living adults measured with a single-dose method. *I. McClelland, M. Danielsen & A. A. Jackson* 42A
Limits of adaptation to a low-protein diet in normal adults: urea kinetics. *M. Danielsen & A. A. Jackson* 43A
Whole-body protein turnover in healthy young women at different stages of the menstrual cycle. *G. Grove & A. A. Jackson* 44A
Effect of manipulation of the efficiency of nitrogen retention by diet on plasma insulin-like growth factor-1 (IGF-1) concentration. *G. V. Kriel & M. A. Lomax* 45A
Interaction between endotoxaemia and low protein intake on rat skeletal muscle contractile characteristics. *L. B. Levy & S. A. Wootton* 46A
MRI estimates of changes in adipose tissue area with weight loss. *J. Love, M. A. Foster, G. McNeill & V. Antfang* 47A
The effect of smoking cessation on energy expenditure and body-weight. *By Mary Cursiter, M. Holmes & Sheila Jennett* 48A
Energy intake and expenditure in divers during a 450 m working dive. *Paul Haggarty, Geraldine McNeill, Brian A. McGaw, Susannah L. Christie, Deborah C. Morrison, Eric Milne & Gary Duncan* 49A

Feeding pattern in humans. 1. The relationship between feeding pattern and body-weight. *C. D. Summerbell & R. C. Moody* 50A
Feeding patterns in humans. 2. Feeding patterns and sources of energy intake. *C. D. Summerbell & R. C. Moody* 51A
Carbohydrate balance and day-to-day food intake in man. *R. J. Stubbs, P. R. Murgatroyd, G. R. Goldberg & A. M. Prentice* 52A
Effect of dietary fat content and choice on intake and performance of growing pigs. *Rhona Urquhart & K. J. McCracken* 53A
The effect of adding 10% maize oil to the diet on body fatness and food intake in broiler chickens. *A. Y. Yalda & J. M. Forbes* 54A
Effect of dietary supplemental ascorbic acid on performance and choice feeding of broiler chicks under heat stress. *H. R. Kutlu & J. M. Forbes* 55A
The effect of force-feeding various levels of protein on diet selection and growth of broiler chickens. *F. Shariatmadari & J. M. Forbes* 56A
Effects of meat species and particle size on postprandial satiety. *Jennifer A. French, Clare J. Wainwright, David A. Booth & Jan Hamilton* 57A
Gene expression and the metabolic role of zinc. *J. K. Chesters, R. Boyne & Linda Petrie* 58A
Stable isotope studies of short-term plasma zinc kinetics in normal human subjects. *N. M. Lowe, J. M. Rhodes, A. Green & M. J. Jackson* 59A
In vitro studies on transepithelial phosphate transport in the small intestines of goats and sheep. *G. Breves, H. Kaeppner & B. Schroeder* 60A
Stimulation of trace element absorption by major metals in vitro. *J. B. Adekalu & F. W. Heaton* 61A
Effect of ascorbic acid and lemon juice on tea-inhibited iron absorption in suckling rats. *A. Flynn & M. Reddy* 62A
Progressive effects of selenium deficiency on the acute cold-induced stimulation of type II iodothyronine deiodinase activity in rat brown adipose tissue. *J. R. Arthur, G. J. Beckett, F. Nicol, Y. Guo & P. Trayhurn* 63A
Food consumption and nutritional status of adolescents in Birmingham. *Fati Rabiee, J. Munn & J. Lutz* 64A
A pilot study to investigate nutritional deprivation among low-income households in London. *Penny Allen & Elizabeth Dowler* 65A
Are practice nurses an effective means of delivering dietary advice as part of health promotion in primary health care? *Alison Kyle* 66A
Nutritional knowledge and attitudes towards nutrition education in medical students at Southampton University Medical School. *P. Heywood & S. A. Wootton* 67A
Attitudes to food allergy: families in Dublin. *S. Sugrue & N. P. Kennedy* 68A
Basal metabolic rate and body composition in Mexican males of different body mass index. *M. E. Valencia, S. Y. Moya, G. McNeill & P. Haggarty* 69A
A new approach to the measurement activity and work efficiency in a whole-room indirect calorimeter. *T. J. Horton, M. Sun & J. O. Hill* 70A
Validation of the doubly-labelled water (DLW) method in growing pigs. *Paul Haggarty, Malcolm F. Fuller, Susannah L. Christie, Brian A. McGaw, Eric Milne, Gary Duncan & John S. Smith* 71A

Validations of dietary assessment using doubly-labelled water. *A. E. Black, G. R. Goldberg, S. A. Jebb, S. A. Bingham, M. B. E. Livingstone & A. M. Prentice* 72A
Energy intake and basal metabolic rate of children with chronic asthma. *S. Zeitlin, S. A. Bond, M. Radford & S. A. Wootton* 73A
Energy intake and basal metabolic rate in paediatric oncology patients receiving chemotherapy. *S. Bond, J. Kohler & S. A. Wootton* 74A
Raised resting energy expenditure in subjects with middle-aged onset of Parkinson's disease. *M. Cox, H. Marcus, R. Abbott, M. Hodkinson & A. M. Tomkins* 75A
The blood pressure of Gambian children – effects of maternal weight during pregnancy. *B. M. Margetts, A. M. Cruddas, M. G. M. Rowland, F. A. Foord, T. J. Cole & D. J. P. B. Barker* 76A
Effect on birth weight of a community-based supplementation programme for pregnant Gambian women: first year results. *S. M. Ceesay, S. Saidykhan, A. M. Prentice, T. J. Cole, K. C. Day, M. G. M. Rowland, L. T. Weaver & R. G. Whitehead* 77A
Effect of weaning foods on breast milk intake in Gambian infants. *R. M. Downes, A. M. Prentice, W. A. Coward, R. G. Whitehead & L. T. Weaver* 78A
Effects of maternal tissue protein depletion at parturition on subsequent lactational performance in rats. *A. P. Pine, N. S. Jessop & J. D. Oldham* 79A
Performance of dairy cows of different genetic index offered diets differing in forage:concentrate ratio over a full lactation. *J. D. Oldham, H. Parkinson, P. Persaud & G. Simm* 80A
Nutrition–endocrine interrelations and growth in suckled lambs. *J. M. Bassett* 81A
Effect of rearing neonatal lambs in a cold or warm environment on thermogenesis during slow-wave sleep. *C. J. Darby, L. Clarke, M. A. Lomax & M. E. Symonds* 82A
Total energy expenditure of free-living Chinese infants and toddlers in Hong Kong from 6 months–2 years. *S. S. H. Lui, S. S. F. Leung, F. H. Y. Yuen & W. A. Coward* 83A
The effect of morbidity on the growth of stunted and non-stunted children. *S. P. Walker, C. A. Powell, S. M. Grantham-McGregor, D. T. Simeon & J. H. Himes* 84A
Brown fat-specific mitochondrial uncoupling protein in adipose tissues of neonatal goats. *Paul Trayhurn & Jacqueline S. Keith* 85A
Genetic variation in diet-induced thermogenesis in birds. *P. A. Geraert, Solange Guillaumin, A. Bordas & P. Merat* 86A
The influence of genotype, diet and stage of lactation on erythrocyte ATPase activity in dairy cattle. *A. P. Pine, N. S. Jessop & J. D. Oldham* 87A
Effects of tumour necrosis factor-α (TNF-α) on lungs and liver in mice are modified by fats of varying saturated, monounsaturated and polyunsaturated fatty acid content. *S. Bashir & R. F. Grimble* 88A
Oleic acid as a determinant of the difference between the suppressive effects of coconut oil and butter on responses to tumour necrosis factor α (TNFα) in rats. *Hilda Mulrooney & R. F. Grimble* 89A

Changes in basal metabolic rate, fasting respiratory quotient and body fat following energy supplementation of chronically-undernourished individuals. *M. J. Soares, R. N. Kulkarni, L. S. Piers, M. Vaz & P. S. Shetty* 90A

The effect of changes in dietary carbohydrate *v.* fat intake on 24 h energy expenditure and nutrient oxidation in post-menopausal women. *G. McNeill, D. C. Morrison, L. Davidson & J. S. Smith* 91A

Energy balance in healthy elderly women. *J. J. Reilly, A. Lord, V. W. Bunker, A. M. Prentice, W. A. Coward, A. J. Thomas & R. S. J. Briggs* 92A

21/22 November 1991

Basal metabolic rate and fuel oxidation rates in chronic obstructive pulmonary disease. *J. H. Green, P. N. Bramley & M. F. Muers* 94A

Nutrition team audit. *C. E. Plester, K. C. H. Fearon, R. Richardson, P. Rogers, C. Sedgwick, J. McWhirter, H. Reddy & O. J. Garden* 95A

Infection with human immunodeficiency virus does not prevent the acute anabolic response to nutrition. *D. C. Macallan, M. A. McNurlan, P. J. Garlick & G. E. Griffin* 96A

The independent metabolic effects of anaesthesia and surgery. *F. Carli, J. Webster & G. Ronzoni* 97A

Metabolic responses to interleukin-1 (IL-1) are attenuated by dietary eicosapentaenoic (20:5 *n*-3) and docosahexaenoic (22:6 *n*-3) fatty acids in the rat. *A. L. Cooper, K. Weddell, T. A. B. Sanders & N. J. Rothwell* 98A

Effect of Ibuprofen on the acute-phase response and whole-body protein turnover of weight-losing cancer patients. *T. Preston, K. C. H. Fearon, F. P. Winstanley, C. Slater, D. C. McMillan, A. Shenkin & O. J. Garden* 99A

Lymphocyte protein synthesis: an in vivo measure of activation. *K. G. M. Park, S. D. Heys, O. Eremin & P. J. Garlick* 100A

Effects of surgical trauma on muscle protein synthesis at local and distant sites. *A. Ghusain-Choueiri & P. W. Emery* 101A

The influence of respiratory quotient and serum lipid levels on thermic effect of continual enteral nutrition. *L. Sobotka, Z. Zadak & J. Chaloupka* 102A

Plasma amino acids and peptiduria during intravenous infusion of a short-chain ovalbumin hydrolysate, or its equivalent amino acid (AA) mixture, in man. *G. K. Grimble, P. C. Aimer, P. Morris, A. Raimundo, B. Weryk & D. B. A. Silk* 103A

The effect of alanyl-glutamine peptide supplementation on muscle protein synthesis in post-surgical patients receiving glutamine-free amino acids intravenously. *J. M. Barua, E. Wilson, S. Downie, B. Weryk, A. Cuschieri & M. J. Rennie* 104A

Glutamine promotes interleukin-2 production by concanavalin A-stimulated lymphocytes. *P. C. Calder & E. A. Newsholme* 105A

Glutamine increases protein synthesis in heart, skeletal muscle, liver and gut of dexamethasone-treated rats. *P. W. Watt, H. S. Hundal, S. Downie & M. J. Rennie* 106A

Effects of major and minor surgery on plasma glutamine and cytokine concentrations. *M. Parry-Billings, E. A. Newsholme, R. Baigrie, P. M. Lamont & P. J. Morris* 107A

Evidence for tumour-induced changes in basal metabolic rate in patients with small cell lung cancer. *Susan A. Jebb, R. J. Osborne, A. K. Dixon & M. Elia* 108A

A multi-tracer investigation of the effect of a flooding dose administered during the constant infusion of tracer amino acid on the rate of tracer incorporation into human muscle protein. *K. Smith, P. Essen, M. A. McNurlan, M. J. Rennie, P. J. Garlick & J. Wernerman* 109A

Correlation of albumin synthesis rates with the Child–Turcotte score (CTS) in patients with cirrhosis of the liver. *P. E. Ballmer, D. Walshe, M. A. McNurlan, P. W. Brunt & P. J. Garlick* 110A

Insulin reduces leucine oxidation and improves nitrogen balance in the parenterally-fed state. *B. C. N. Ang, D. Halliday, A. J. Wade & J. Powell-Tuck* 111A

Growth, nitrogen retention and peptiduria in TPN-fed rats receiving short-chain protein hydrolysates. *G. K. Grimble, A. K. Wennberg, L. Magnusson, P. C. Aimer, P. Morris & D. B. A. Silk* 112A

The cytokine response to abdominal sepsis. *D. J. Leinhardt, G. L. Carlson, W. R. Lamb, P. E. C. Brenchley, R. A. Kay, K. A. Shipley & M. Mughal* 113A

Changes in tissue protein distribution in the rat after sequential injections of turpentine. *Monica Wusteman & Marinos Elia* 114A

Absence of hypermetabolism following operation in the newborn infant. *L. K. R. Shanbhouge & D. A. Lloyd* 115A

The effect of *n*-3 and *n*-6 polyunsaturated fatty acids on the T-cell function of healthy controls and weight-losing pancreatic cancer patients. *J. S. Falconer, K. C. H. Fearon & J. A. Ross* 116A

Measurement of whole-body protein turnover using [^{15}N]-glycine as tracer fails to demonstrate changes in response to hyperinsulinaemia in post-absorptive man. *B. C. N. Ang, A. J. Wade, D. Halliday & J. Powell-Tuck* 117A

Bed rest decreases whole-body protein turnover in the post-absorptive state. *B. C. N. Ang, D. Halliday, S. Georgiannos & J. Powell-Tuck* 118A

Augmentation of plasma arginine and glutamine by ornithine α-ketoglutarate in healthy, enterally-fed volunteers. *G. K. Grimble, C. Coudray-Lucas, J. J. Payne-James, L. Cynober, F. Ziegler & D. B. A. Silk* 119A

In vivo and in vitro assimilation of orally-administered dextran 40KDa in man. *G. K. Grimble, S. C. Collins & D. B. A. Silk* 120A

Ileal starch output in two groups of differing colonic cancer risk. *D. M. Bradburn, J. C. Mathers, A. Gunn, J. Burn & I. D. A. Johnston* 121A

Changes in feeding behaviour in cachectic tumour-bearing rats during the period of tumour growth. *O. A. Obeid & P. W. Emery* 122A

The effect of chronic dietary restriction on post-prandial glycogen and lipid synthesis in the rat. *T. T. A. Carpenter, O. A. Obeid & P. W. Emery* 123A

Can energy expenditure be measured in critical illness using [^{13}C]-labelled bicarbonate? *J. C. Devlin, Lynn Newman, S. T. Brookes, Therese A. Samuels, Ceri J. Green & I. T. Campbell* 124A

Anthropometric indices of lean body mass using ultrasound. *Tracey Watt, D. Withers, D. Martin & I. T. Campbell* 125A

Daily body-weight changes in critical illness. *Irene Hall, B. J. Pollard & I. T. Campbell* 126A

The use of a four-component model for evaluation of the density and the hydration fraction of fat-free mass, and for validation of bedside prediction methods of body composition. *N. J. Fuller, S. A. Jebb, M. A. Laskey, W. A. Coward & M. Elia* 127A

Low incremental workload cycle ergometry during in-patient nutritional treatment of patients with anorexia nervosa. *R. Das Gupta, J. Powell-Tuck, A. J. Wade, J. Treasure & A. W. Goode* 128A

Biochemical indices of malnutrition in middle-aged onset patients with Parkinson's disease. *R. A. Abbott, H. Markus, M. Cox & A. Tomkins* 129A

Admission characteristics of elderly orthopaedic surgical patients categorized into high and low nutritional risk groups by objective tests of nutritional status. *C. M. Williams, M. Lumbers, L. Driver & R. J. Howland* 130A

Long-term follow-up of elderly orthopaedic surgical patients nutritionally assessed on admission to hospital. *M. Lumbers, L. Driver, R. J. Howland & C. M. Williams* 131A

Nutritional influences on recovery and length of hospital stay in elderly women following femoral fracture. *Katrina M. Brown & Nichola A. Seabrook* 132A

A comparison of the efficacy of polyurethane and silastic fine bore catheters for the peripheral venous delivery of intravenous nutrition. *N. J. Everitt, M. Madan, D. J. Alexander & M. J. McMahon* 133A

A randomized comparison between peripheral ultra-fine bore silicone catheters and central silicone catheters for the delivery of high osmolality intravenous nutrition. *M. Madan, D. J. Alexander & M. J. McMahon* 134A

A comparison of performance of five fine-bore naso-gastric feeding tubes. *G. Frost, U. Hasan, P. Gosh, K. Masters, C. King, M. Kelly, J. Stanford, R. Jones, A. Lofthouse & C. Macqueen* 135A

Formulation of a glutamine-containing total parenteral nutrition mixture for clinical use. *G. Hardy, D. Wiggins, B. McElroy & G. R. Thompson* 136A

2/3 April 1992

Site-specific differences in the fatty acid composition of human adipose tissue. *P. C. Calder, D. J. Harvey, J. Evans, C. M. Pond & E. A. Newsholme* 138A

Adipose tissue fatty acids: risk factors for coronary heart disease (CHD)? *C. Bolton-Smith, M. Woodward, R. Tavendale & H. Tunstall-Pedoe* 139A

Lipid content and fatty acid profiles of pig meat. *D. B. Lowe, A. J. Kempster, M. W. Fogden & C. F. White* 140A

Factors affecting the freezing point depression of milk. *H. Mohammedi, P. C. Thomas & M. I. Barclay* 141A

Absorption of water and solute in the human jejunum from sucrose–electrolyte solutions containing calcium and magnesium. *J. B. Leiper, F. Brouns & R. J. Maughan* 142A

Effect of dietary molybdenum supplementation or depletion on *Nippostrongylus brasiliensis* infection in the rat. *E. L. Ortolani, D. P. Knox, G. F. J. Newlands & N. F. Suttle* 143A

Natural mixed nematode infections can induce sodium deficiency in grazing Finnish Landrace lambs. *C. Oosterhuis, K. McLean & N. F. Suttle* 144A

Inhibition of ovine erythrocyte superoxide dismutase activity (ESOD; *EC* 1.14.1.1) in vivo by parenteral ammonium tetrathiomolybdate. *N. F. Suttle, J. Brebner, J. Small & K. McLean* 145A

Slimming with 5 MJ (1200 kcal): 58% *v.* 35% energy from carbohydrate. *M. E. J. Lean, A. Avenell, I. A. Ross, T. Richmond, T. Nicholson & T. Prvan* 146A

Insulin-like growth factor-1 and the fibroblast growth factors as autocrine/paracrine regulators of adipocyte precursor DNA synthesis. *S. C. Butterwith, C. D. Peddie, C. Goddard, I. E. O'Neill, J. Boswell & D. Burt* 147

The indirect effects predicted by a model of adipose tissue metabolism. *J. I. Davies & B. M. Grail* 148A

Factors stimulating proliferation of sheep adipocyte precursor cells. *Kathryn S. Adams, D. J. Flint, R. G. Vernon & A. Cryer* 149A

The effect of triiodothyronine (T_3) treatment on dietary lipid deposition and oxidation in meal-fed and *ad lib.*-fed rats. *Martha L. Cruz & Dermot H. Williamson* 150A

Effects of hyperinsulinaemia or vanadate on lipid partitioning between mammary gland and adipose tissue during lactation and weaning in the rat. *Teresa H. M. Da Costa & Dermot H. Williamson* 151A

Plasma beta-cell tropin in obese and normal children. *J. L. Morton & A. Salvatoni* 152A

The relationship of eating self-efficacy to weight change in obese hospital out-patients. *K. W. Carr & A. W. Gardner* 153A

The effect of cessation of smoking on eating patterns, energy intake and body-weight. *Mary Cursiter, M. Holmes, & Sheila Jennett* 154A

Lipolysis, body composition and hormone levels during normal human pregnancy. *Doris M. Campbell & M. A. Radcliffe* 155A

The effect of breed (Large White × Landrace *v.* purebred Meishan) on the diets selected by pigs given a choice between two foods that differ in their crude protein contents. *I. Kyriazakis, K. Leus & C. S. Haley* 156A

Effects of dietary protein content during lactation on tissue protein synthesis in rats. *A. P. Pine, N. S. Jessop, G. F. Allan & J. D. Oldham* 157A
